

## Long Range Plan

The Library spaces would serve unique functions. Provide physical spaces for a full range of activities, including quiet contemplative study, noisy collaborative work, community events, and informal, unplanned conversations.

- Transform our space /scale back collections and make room for social space.
- Create areas for study or quiet work space.
- Create innovative areas and makerspaces -3D printing, high tech applications, blogger stations, podcasting stations, music rooms etc.
- Stream library programs through Facebook Live or YouTube for access to a wider audience

The Library is more than a building. It is a platform for research and learning.

- Offer comprehensive digital access – digital lending, gaming, digital research.
- Showcase new technologies- be in the forefront.
- Digitize and display more historical/archival documents-preserve the history which is unique to our community.
- Offer personalized services- one on one technology.

The Library continues its partnerships to advance library values and to engage community members.

- Partner with nonprofits -PTA, School, etc.
- Partner with cultural groups- BVAC, BACCA.
- Partner with government entities, Village, Town of Babylon.
- Make sure library events are community focused.

Discussed and accepted at the November 2016 Board of Trustees meeting/vl.
